

TORONTO GIVES GREAT RECEPTION TO GENERAL BOOTH

General Bramwell Booth, Head of the Salvation Army, who has arrived in Toronto, in his tour of the Dominion, was paid a warm tribute by the citizens this evening when he was received in front of the City Hall by Mayor Church. A huge crowd blocked the approaches to the Civic build-

ing and broke into a deafening cheer as the world-famous figure appeared on the steps while a massed band of 500 rendered the National Anthem. He reviewed the members of the Army in Toronto and from many towns in Ontario at Queen's Park, Mayor. Picture shows the General with Mayor Church at the City Hall.

### Alberta Spring Wheat Averages 25 Bushels

Exceeding by seven or eight hundred the mark established in 1919, the thresher licenses issued by the provincial department of agriculture for the present year will reach at least 3,500, according to the government statistician.

Although nothing in the way of an

This growth and development have average will be struck until all the returns are made by the threshers, and thereafter compiled, which is not likely to be before the middle of January, it is estimated that the spring wheat yield for Alberta will be in the vicinity of 25 bushels per acre, one of the best in many years. The estimate average already struck by federal authorities is about 22½ bushels for the province. This is based on the acreage seeded in wheat, whereas the Alberta average is based on the acreage actually threshed as reported in the returns made by the threshers. Therefore, an average of 25 bushels is regarded as fairly accurate. Last year the Dominion estimated an average of eight bushels of wheat for Alberta, while the provincial records gave a general return of 12 bushels.

## THE ELEVATOR SYSTEM

The grain elevator system has grown enormously in Canada and developed rapidly in the last few years. This growth and development have so far been mainly confined to the Prairie Provinces of Manitoba, Saskatchewan and Alberta, but the system is attracting more and more attention in the other provinces, particularly in Ontario, where several wheat growing and shipping centres, notably Toronto, are agitating for the erection of elevators. Nor is it only in numbers that the system has extended, but the increase in size has been such that some of the structures can fairly be termed mammoth, such, for instance, as those at the head of the lakes. There are not

fewer than 3,500 (thirty-six hundred) elevators in the three provinces referred to, from 40 to 60 feet high, and capable of storing from 20,000 to 30,000 bushels a piece on the average, a few reaching to twice the greatest enumerated capacity. In other words upwards of 110,000,000 bushels of wheat can be stored at the one time. By the terms of the Canada Grain

Act, the owners of the elevators, mostly private individuals or incorporated companies, are compelled to accept all grain offered by farmers, unless wet or unstoreable with safety hence the general and common use of the system. The elevators are all licensed by, and are under the supervision of the Board of Grain Commissioners of Canada.

## Clothing for Men

When you want Hardware you buy from an Hardware Man. If Meat from a Butcher. Lumber from a Lumber Man. If you want to be Clothed Well you order from a Clothing Man—Better still from a Clothing Specialist.

No matter how hard you are to fit, your measure will be taken properly which is very essential.

## ARTLAND ARGUS

The thrashers dance at Brady, on Wednesday 13th, given by Scott Bros. and Luthies was a huge success every point of view. There was a lively crowd, and a good program. First dancing till supper; then a perfectly gorgeous lunch, a nice program of singing and step-dancing, etc., and then dancing was resumed and kept up till nearly six. All are unanimous in thanking Scotts and Luthies for a very pleasant evening.

Artland is very fortunate having the addition of a first-class restaurant among its many other attractions. Chas. Reynolds is the proprietor, and he is conducting the business in J. A. Proctor's former residence. Those farmers, who, breakfasting early and with long hauls ahead of them, will welcome the thought of a good warm meal at it is well known to most of this district.

There will be a Christmas Tree, Concert and Dance at Brady School on Tuesday, December 21st.

Following are the committee in charge:

## NOTICE For Nomination for Elections

RURAL MUNICIPALITY OF  
MANITOUL LAKE, NO. 442  
MUNICIPAL ELECTIONS 1920  
Public Notice is hereby given that a meeting of the Electors of the Rural Municipality of Manitou Lake No. 442 will be held at the Cliff School N.W. 1-4 31-44-25, 2, on Monday the sixth day of December 1920, from one o'clock to two o'clock in the afternoon (mountain standard time) for the purpose of Nominating Candidates for the Office of Reeve of the Municipality and a Councillor for each Division, and of hearing read the Interim financial statement for the first 10 months of the year.

Given under my hand at Morden, Sask. this 2nd day of Nov. A.D. 1920  
J. BRADLEY,  
Returning Officer.

Tree—Mrs J. Paterson; Miss Allison. Concert—Mrs. Watson, Mrs. Geo. Lawton. Decoration and supper—Mrs. J. A. Graham; Mr. Mrs. Geo. Lawton, Dance Geo. Lawton and Mrs. J. A. Graham.

Prizes to be left in the hands of Secretary Mr. K. W. Coe.  
Mr. Coe reports that he has \$40.00 towards the \$70.00 which is needed. Pending afterwards please note. The next committee meeting will be held at Mrs. Paterson's December 4. With the above efficient committees in charge, we believe the event will be very successful. Watch for further particulars.

The Local G.G.A. of Morden received a cor-dol of coal on Wednesday.

Mr. and Mrs. Brown, of Morden were visitors in Chauvin last week.

## Election Of Council

The time is not far distant when it will be up to the ratepayers of Chauvin to elect a council. In considering the men who shall be selected to re-

Dated November 12th 1920.

STANLEY K. CARTER  
Poundkeeper  
P.O. Box 168, Chauvin, Alta.

present the council it is most desirable, and essentially important that the men about whom we are minded, men who can familiarize themselves with detailed and minor matters of management, and also men who are able to see ahead, act wisely and to fight unflinchingly for broader and better ideas.

We are at a point in our town's history which is perhaps more important than appears on the surface and which may be missed by the unthinking individual. It is well that we should give this situation more than ordinary consideration. We are surrounded by a district second to none; development is proceeding apace, and what we are going to be is according to the temper of the people of the town and their representatives.

Let us ask ourselves, what are we going to be? Shall we be content to always be a place of the village class or shall we aspire to be greater? To be one is easy. To be the other requires men who are competent to see ahead, to act wisely and fight for higher and better ideas. Shall we have men who may be sincere, but who are lacking in foresight, who are quite without vision? Or shall we have men who, though thick and thin will preach the fables of advancement and who cannot be discouraged even in the face of such apathy and thoughtlessness as we see so much of about around about us.

The constructive period of Chauvin is not yet over. There remains much to be done. The advantages we have and the fertility of our district must be made known to the multitudes who are coming into the west every year. We must lay our foundations broad and deep. We must avoid that retrograde movement or even stagnant conditions which may be observed in places we have known. Let all then lend a hand and help all the ship along to victory and success which awaits us and which is ours if we will only strive for it.

## Milking Cows

Shall a cow be milked twice or three times a day? To the average reader this may seem of small concern. To the farmer and dairymen it is a question of considerable interest. Tests have recently been made in Nova Scotia, Quebec, and Ontario. Professor Barton of Macdonald College says that it has been found from the standpoint of economy and safety that a cow giving 60 pounds of milk a day should be milked three times a day. Both Professor Trueman of the Nova Scotia Agricultural College and Professor Barton are agreed, however, that unless the udder is over extended there is little or no advantage to be gained by milking three times a day in the September number of the Agricultural Gazette of Canada. Professor Wade Toole also contributed to a solution of the same problem by giving results of tests made at the Ontario Agricultural College. The tests are to be continued and Professor Toole hopes to be able to give a more definite opinion another year than he does at present. In the mean time he shows that three high-grade pure-bred cows gave more by twice than by twice milking a day. His present conclusions however are the same as those of Professors Barton and Trueman.

## The Seeing Eye

Principal Reynolds of the Ontario Agricultural College thus delivers himself in the Agricultural Gazette of Canada:

The teacher who hopes to take a right place in the life of the country school district must cultivate the seeing eye and the understanding heart for persons and things rural. The usual popular, melodrama, comic supplement, moving picture, conception of the farmer and of country people must be forgotten. It is essentially, and perniciously false. The farmer is something of a humorist, and takes delight in deceiving the simple-minded by a somewhat unfin-

ished exterior. The city-bred person makes the fatal mistake of judging by outside appearances. To the city-trained eye there are two classes of persons, one wearing overalls and the other wearing white collars. The former class work with their hands. The latter class work with their brains. That is the superficial judgment, which ignores the fact that there is a very great deal of clear, man wearing overalls. At any rate, the farmer belongs to both classes. The more he understands of those discoveries, which it is the business of

the agricultural college to make, the more he absorbs the teaching which it is the business of the college to spread abroad, the better farmer will he be.
